

*Solubility is a critical factor for the successful outcome of your project. Our formulation screening platform ensures that solubility issues don't stand in your way.*

**At Evotec, we do smart screening.**

Our experience, after helping partners globally, confirms that shotgun approaches will run up large costs and may miss important formulation parameters.

Based on your project needs, we apply in depth analysis of the physicochemical properties of the API coupled with our extensive formulation knowledge to provide tailored screens that will get you to the answer, faster.

Evotec has a wide range of technologies which will deliver a finished dosage form of your API. Some examples:

<b>Amorphous API</b> <ul style="list-style-type: none"><li>▶ Spray Drying</li><li>▶ Hot Melt Extrusion</li><li>▶ Melt granulation</li></ul>	<b>Nanosizing and nanomaterials</b> <ul style="list-style-type: none"><li>▶ Top bottom (wet bead milling)</li><li>▶ Bottom up (jet impinging reactor) </li></ul>	<b>Particle size reduction</b> <ul style="list-style-type: none"><li>▶ Micronisation</li><li>▶ Milling</li></ul>
---	---	--

▶ When you deal with a challenging API, partner with Evotec's screening experts to guide your process through every challenge along the drug discovery and development journey through to the clinic.

▶ We take time to thoroughly understand your API's physicochemical profile and the bioavailability needs.

▶ We combine data and expertise to create a panel of formulations that we can test for the optimal results

*E.SOLVE – a formulation screening partner you can trust.*
