

Quality Hits At Lightning Speed

Accelerated Hit Finding Through Innovative Screening Approaches

Why Choose Evotec?

- ▶ **Efficiency:** Optimized Hit ID strategy ensures hit delivery in a cost-and time efficient manner
- ▶ **Collaborative approach:** Together with our partners, Hit ID projects are tailored to their needs
- ▶ **Breadth of HTS read-outs:** Biochemical, cell-based, biophysical, anti-infective, phenotypic, and imaging-based HTS up to 1,536-well formats
- ▶ **Cutting-edge modality expertise:** Expansion into small molecules targeting RNAs, Degraders, Molecular Glues, Covalent Binders, Splicing Modulators
- ▶ **Footprint:** State-of-the-art infrastructure operated by highly experienced teams at sites in France and Germany
- ▶ **Compound collection:** Maximally diverse and well curated libraries; possibility to host and screen partner decks
- ▶ **Innovative technologies:** *In silico* screening / AI/ML-supported workflows and data analysis
- ▶ **Multi-disciplinary support:** Medicinal Chemists continuously assess screening results to identify best compound starting points
- ▶ **Flexible business model:** Hit ID at Evotec can be ordered flexibly as stand-alone project or embedded in larger collaborations

12

Fully automated screening systems

>850k

Compounds available for screening

>750

HTS campaigns in total

>1,500

Assays developed
